## Teatro Vista values:

**a philosophy of abundance.** We share knowledge and resources across communities and disciplines creating access and opportunities to excel.

**a legacy of leadership.** We are the representation we seek. We provide professional development opportunities to our ensemble and collaborators that can open pathways towards leadership positions. This is how you create change-makers in the entertainment industry. Once directors, producers, executive producers, and network executives look like us, we will begin to see an authentic change within representation in front of the camera and behind it.

**a culture of authentic inclusion.** We believe whatever the artist of color designs is inherently genius, we do not ask them to fit into a mold that doesn't feel authentic to their experience. We invite not only Latino/e talent but all artists of marginalized identities to help build the table with us. We cannot thrive alone, we do so in community. "Pa'lante, juntos."

**stories that start with us.** The depth of the Latino/e experience told through the viewfinder of American life can give way to a multiplicity of experiences. Through our storytelling, we provide audiences with a nuanced cultural awareness and understanding about the Latino/e community and beyond.
